Base Eater™

Description

- Transforms caustics, bases and strong amines into water-soluble organic salts.
- Eliminates 100% of disposal costs.
- A 2:1 neutralization ratio with most caustics.
- PH indicators eliminate need for pH strips or meters.
- Neutralizes vapors and reduces odors.
- Variety of uses and applications including spraying, atomizing, mops, floor scrubbers on horizontal, vertical and perforated surfaces.
- Easy and safe to use and can be applied on a variety of surfaces.
- Non-hazardous, non-corrosive and biodegradable.

Safety Spill Kit

Item # 4901-005

Technical Information

Usage	Dilution Ratio	RTU
Physical Properties	Appearance	Liquid
	Color	Blue
	Fragrance	None
	pH	7
	Shelf Life	Minimum 1 Year
Primary Packaging	4900-005	(1) 5 gal./18.9 L
	4900-055	(1) 55 gal./208 L

Advantages

Base Eater™ is an easy and quick solution for clean-up after the neutralization process, unlike conventional alkali/caustic neutralizers which are powders or socks and pads. Powders are difficult to clean up and cannot be used in a variety of settings. For example, if the conditions are wet and/or windy, applying powders would be extremely difficult, if not impossible. Socks and pads must be disposed of properly which increases the total costs of alkali/caustic spill clean-up, and this method cannot be used in a variety conditions like powders an other conventional clean-up alkali/caustics neutralizers. Base Eater™ may be applied in a variety of conditions and settings. For example, it may be poured on spills, sprayed in hard-to-reach areas and vertical surfaces.

Application

Atomize Base Eater™ into the air surrounding spill to neutralize any vapors and reduce initial odors with spray apparatus. Gently pour and/or spray the Base Eater™ working from the outside of the spill inward. Base Eater™ will change colors in the presence of caustics/bases. It will reverse the color change when the solution is neutralized. Wipe, mop or allow the spill to air dry. Rinse personnel protective equipment with plenty of water to remove any chemical residues before re-using.
